

Perplexity

PERPLEXITY AI

SEARCH

“Built to answer, not just chat — a research engine that cites its sources and now browses and acts for you through Comet.”

BEST FOR

- Research questions that need current, cited sources
- Quick fact-checking with linked evidence instead of a bare answer
- Comet browser agent: form fills, bookings, email drafting while you do something else
- Comparing answers across top models (GPT-5, Claude Opus) in one place
- Multimedia answers with generated images and video

NOT BEST FOR

- Not built for long, open-ended creative writing or brainstorming
- Max tier (\$200/mo) only pays off if you actually use the autonomous agent features
- Less model customization/fine-tuning than developer-first platforms

GETTING STARTED

- Go to perplexity.ai and ask a real question — no account needed for basic search.
- Sign up free to save threads and get more daily searches.
- Install the Comet browser (free) to get agent features built into browsing.
- Upgrade to Pro (\$20/mo) for extended search limits and access to top-tier models.

PRICING

PLAN	PRICE	NOTES
Free	\$0/mo	Basic search, limited daily queries
Education Pro	\$10/mo	Student-verified discount on Pro
Pro	\$20/mo	Extended search, top-tier models, Comet, file uploads
Max	\$200/mo	Highest limits, autonomous agent tasks run in the background
Enterprise Pro	\$40/seat/mo	Team admin controls

KEY FEATURES

- Every answer comes with cited, clickable sources by default
- Comet: an agentic browser that fills forms, books, drafts email, and shops for you
- Pro gives access to GPT-5, Claude Opus, and other frontier models in one interface
- Comet Plus (\$5/mo, included in Pro/Max): access to premium publisher content
- Image and video generation built directly into search results

PROMPT TEMPLATES

“Research [topic] and give me a cited summary with the 3 most credible sources.”

“Compare these two vendors and cite where each claim comes from: [names]”

“Book me a table for 4 at 7pm Friday somewhere highly rated nearby.”

“Track this product's price and email me when it drops below \$[X].”

QUICK REFERENCE

Start fresh	New thread, top left
Get cited answers	Just ask — sources are automatic
Automate a task	Use the Comet browser agent
Compare models	Switch the model dropdown mid-thread on Pro
Go deep on a topic	Use Pro Search / Deep Research mode

PRO TIPS

- Perplexity's real value is the citations — always check the linked sources before trusting a sensitive claim.
- Comet is worth installing even on the free plan; the agent features are what separate it from a normal search engine.
- Switch models mid-conversation on Pro if one model's answer style doesn't fit the task.
- Don't upgrade to Max unless you'll actually delegate real tasks to the background agent — Pro covers most research needs.
